Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggests a duty cycle management method for limiting the transmission duty cycle of a transmitter of a wireless device whereby the transmitter transmits packets in the form of individual packets and/or packet bursts, comprising: a predetermined maximum number of contiguous packets the transmitter operable over a duration measurable as a series of time windows comprising a predetermined number of timeslots having a predetermined nominal duration, the transmitter configured for transmitting a packet during one timeslot and having an associated predetermined duty cycle limit for the transmitted packets, the method comprises limiting the number of packets transmitted during each time period defined by one time window or adjacent time windows, on a sliding basis, so as to limit the duty cycle of transmission during successive adjacent time windows to the predetermined duty cycle limit, whereby the transmission of packet is delayed as needed to establish sufficient idle periods during the time window or adjacent time windows to maintain the duty cycle within the limit as recited in independent claims 1, 6 ad 9.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
